Infodapter Interface
for select Fiat vehicles

Application
Fiat Ducato 2014>
Fiat 500L 2014>
Fiat 500* 2015>

For vehicles with Uconnect system

Designed and
Engineered
in the UK.

ABOUT

The Aerpro Infodapter for Fiat vehicles allows vehicle setting and parking sensor information to be displayed on any aftermarket head unit with rear camera input. The Infodapter also allows the use of the steering wheel controls with almost every steering wheel control compatible head unit on the market.
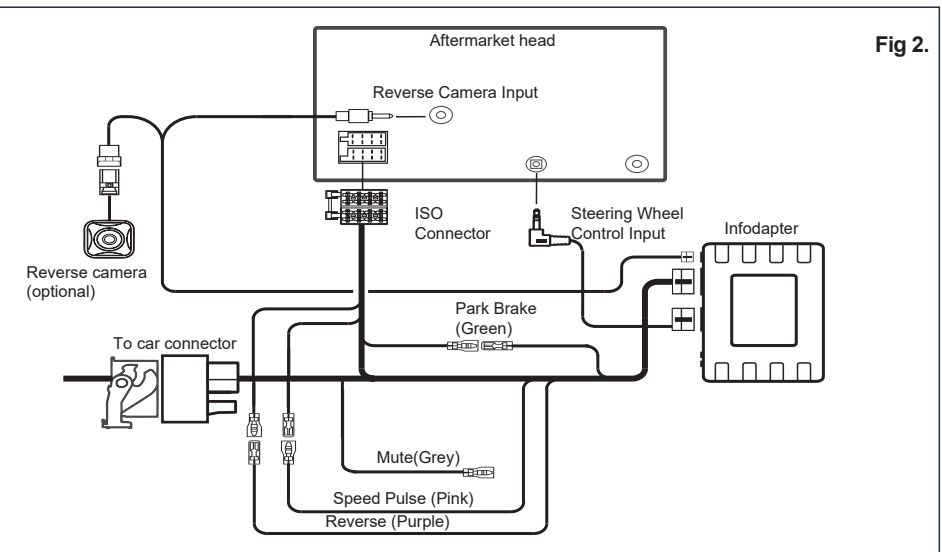

DIP SWITCH SETTINGS

See Fig 1.

Up = Off, Down = On

1: On = Pioneer head units. Off = All other head units

2: Setting for reverse camera. On = PAL, Off = NTSC. The default setting is Off (NTSC).

3: Resets the display settings back to default. If the display settings have been manipulated in a way that it is no longer possible to make adjustments, change the DIP switch #3 from Off to On and back. This will reset the screen settings to the factory defaults. During this procedure the screen background will change to red. While the background is red, no settings can be made.

4: Not applicable

Interface Connections

Reverse Camera output to head unit and reverse camera input from optional camera

Power Harness

Steering Wheel Remote control connector to head unit

Configuration Menu

To access the menu, **push and hold the speech button** for 2 seconds (Fig. 3). This will enable the configuration menu. To navigate through the menu options use the **Track Up/ Track Down buttons.** To select a menu option, push the **speech button once**.

```
          Configuration Menu
          Vehicle Settings
         Infodapter Settings
              Language
               Version
              < Back
```

- **Vehicle Settings**
  Vehicle settings can be adjusted via the menu. All vehicle setup options that were available with the original head unit, are now available through the aftermarket head unit. See the vehicle handbook for more information regarding these features.

```
           Vehicle Settings
               Display
               Clock
     Safety and Driving Assistance
               Lights
           Doors and Locks
              < Back
```

- **Infodapter Settings**

o Screen Size/Position -
   Make sure all 4 corner markers are touching the corners of the aftermarket head unit display.

```
          Screen Size/Position
            Horizontal Size
          Horizontal Position
             Vertical Size
           Vertical Position
              < Back
```

Configuration Menu...continued

○ Picture Settings -
Adjust Brightness, contrast and
colour saturation.

○ Preferences -

Park Assist Version - Select according to the
colour configuration of the park assist fitted to
the vehicle.

Camera Connected - Select Yes if an optional
camera is connected.

Reverse Priority* - Select which image (Camera
or Park Assist) will be shown by default when
reversing. The driver can select the desired
image by pushing the Source button (Fig.3)
while reversing. (*Note this option is only
available when Camera Connected is set to
Yes)

Park Brake Source - Set to Speed, Brake or
Always On.

Restore factory settings - Reverts all
Infodapter settings to factory defaults.
(This does not restore vehicle settings)

FLASHING ODOMETER

Press And Hold the Speech button for 2 seconds and this should bring up the 'Configuration Menu'
on the screen of the aftermarket radio.

Select 'Infodaptor Settings' from the 'Configuration Menu'

Select 'Preferences' from the 'Infodaptor Settings' Menu

Select 'Security Type' from the 'Preference' Menu

The option will be set to 'Type 1', if you have the flashing Odometer select 'Option 2'

Exit Infodaptor Menu.

When this is done allow the vehicle to power down by switching off the ignition and
leaving the vehicle approximately 20 minutes.
